

February 18-22, 2019

Important Events This Week:

- No School for Mid-Winter Break – Monday
- Homework Packet with #4.8, #4.9, and #4.10 Due – Wednesday

We have been continuing to work on double-digit subtraction in class and we are moving into working on those skills inside of word problems. Please help your child work on their addition and subtraction math facts, it is one of the best ways to help them be successful in this unit.

If you are having trouble figuring out which strategy your child is using for their subtraction homework, don't worry! There are many different ways to solve a problem and all are accepted. We focus on each child using a strategy that is successful and that they understand. We then move toward those strategies that are the most efficient for each problem. Feel free to teach your child whatever way you figure out double-digit subtraction. Chances are that we have already talked

about it in class and it might be a great one for your child to use.

We only have a few more weeks until the end of the second trimester so please remember to have your child reading 15-20 minutes, at least 4x a week. It is one of the most effective ways to help them grow in their reading ability.

Thank you again, parents, for all of your support. Call anytime if you have questions.
